

EDUCATION

State University — B.S. in Computer Science, Minor in Mathematics Expected May 2028
GPA: 3.72/4.0
Relevant Coursework: Data Structures, Algorithms, Computer Systems, Linear Algebra, Probability

EXPERIENCE

Software Engineering Intern, Acme Logistics Jun 2026 – Aug 2026

- Built a Python and FastAPI service that routes 40,000 shipment events per day into PostgreSQL
- Reduced p95 API latency by 35% by adding Redis caching and rewriting two hot SQL queries
- Wrote unit tests with pytest, raising coverage from 52% to 81%, and set up GitHub Actions CI

Undergraduate Research Assistant, Machine Learning Lab Jan 2026 – Present

- Trained PyTorch models for image classification on a 120k-image dataset, improving accuracy by 6%
- Worked on data cleaning scripts with pandas and NumPy for the lab's shared datasets

PROJECTS

StudySync | React, TypeScript, Node.js, MongoDB Sep 2025

- Developed a real-time study-group app used by 600+ students, with WebSocket chat and scheduling
- Deployed on AWS with Docker; handled 2,000 daily active users during finals week

Chess Engine | C++

- Implemented alpha-beta search with move ordering, reaching 2100 Elo against Stockfish level 5

Budget Bot | Python, Flask

- Created a Discord bot that categorizes expenses from receipts using OCR
- I was responsible for the database schema and helped with the frontend

LEADERSHIP

Vice President, Association for Computing Machinery (ACM) Chapter Aug 2025 – Present

- Organized 3 hackathons with 250+ participants and \$8,000 in sponsorships

SKILLS

Languages: Python, Java, C++, TypeScript, JavaScript, SQL
Frameworks: React, Node.js, FastAPI, Flask, PyTorch, pandas, NumPy
Tools: Git, Docker, AWS, Linux, PostgreSQL, Redis, MongoDB
